Department of Electrical and Computer Engineering
University of Waterloo

October 29, 2024

The exam is based on material we have covered in the lectures & labs.

The exam covers topics up to and including topic 14 (threads).

Lab questions could cover labs 1 and 2.

There will be no questions allowed during the exam.

If you need to make an assumption, please do so.

It's a closed book exam, but you get a calculator and your reference notes, and we provide a reference sheet.

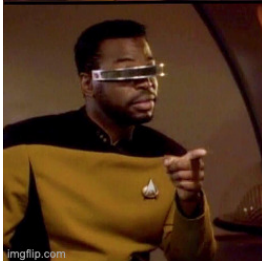

What do questions look like?

- Best guide: last term's midterm & final (in Learn)
- Also look at the practice problems (in Learn)

Okay, but tell me more?

**MEMORIZE TRIVIA
MULTIPLE CHOICE
GUESS WHAT I AM THINKING**

**EXECUTE THE ALGORITHM
COMPLETE THE CODE
ANALYZE AND RECOMMEND**

imgflip.com

Yes, there can be C code questions on the exam.

We are not super strict about syntax (no marks off for a forgotten semicolon).

Use the reference sheet for the system calls!

How to prepare?

- 1 Prepare your reference sheet(s).
- 2 Do the practice problems (pdf) and last term's exams.
- 3 Solve the practice code exercises.
- 4 Understand your lab solutions.
- 5 Ask questions in Piazza for clarifications.
